SUNDAY SCHOOL MANAGEMENT SYSTEM

Date: 08/07/2022
Guide: Ms. Sona Sebastian

1. ## Project Overview?

The Sunday School Management System is a web-based system which will be use for the day-to-day management of a Sunday School. The main objective of this project is to computerize the paperwork in the system and automate the work. The computerization is done so that the storage of all the details regarding students and teachers will be stored in the system which makes system centralized and the chance of duplication of any data is minimized. Automation to the system will reduce the time for storing any data in the system.

2. ## To what extend the system is proposed for?

The Sunday School Management System will manage all the work in any Sunday School in particular order so that the time requirement and complexity of the system will be reduced, at first it will focus on student related information. As a student gets the admission in the school system will start managing the details regarding the students. It will manage the fee details(like the text book fee), and if the full payment has not done, then it will notify about the fee to a staff of the school. This will then display the date of the exam and when the valuation is completed, teachers will update the marks to the system. It will display the results of the students. While the parents can use it to monitor their children's performance.

3. Specify the Viewers/Public which is to be involved in the System?

Students, parents, faculty and parents

4. List the Modules included in your System?

Admin Module
Admission Management Modules
Student Management Modules
Faculty Management Modules
Attendance and leave Management Modules
Digital Resource Management Modules
Communication Module
Parish Management Modules

5. Identify the users in your project?

Vicar of the parish
Students
Faculties
Parents

6. Who owns the system?

The Parish

7. System is related to which firm/industry/organization?

Church

8. Details of person that you have contacted for data collection?

Cyril Perumpuzhakkadavil
Head Master
Fathima Matha Sunday School
Chamampathal

9. Questionnaire to collect details about the project? (min 10 questions, include descriptive answers, attach additional docs (e.g. Bill receipts, certificate models), if any?)

a. Is there an existing digital solution for the management of Sunday School?
b. What are the services to be performed from the office side of the Sunday school?
c. How difficult is it to manage the Sunday school without an automated system?
d. Why do you need a digital solution for Sunday school management?
e. What all details of a student are collected and filed in the Sunday school?
f. How are these details stored and what are the problems that you face in current storage method?
g. How do you manage student and faculty attendance and leaves?
